Seamless SAP - Tableau Integration

Xtract Universal for Tableau

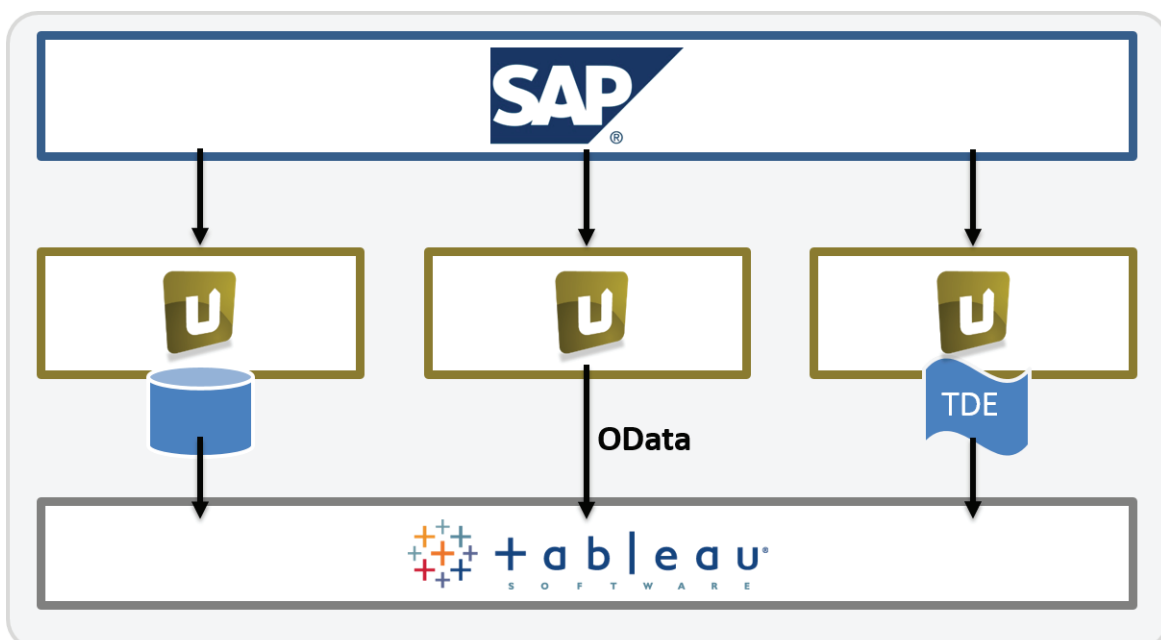

Integrate SAP data into your Tableau reports - fast, straight-forward and user-friendly. Xtract Universal enables you to bring SAP data to your Tableau desktop or server, in a performant and reliable manner. Significantly reduce development and deployment time, with a high degree of automation.

The result is maximum ROI with minimum risk and cost.

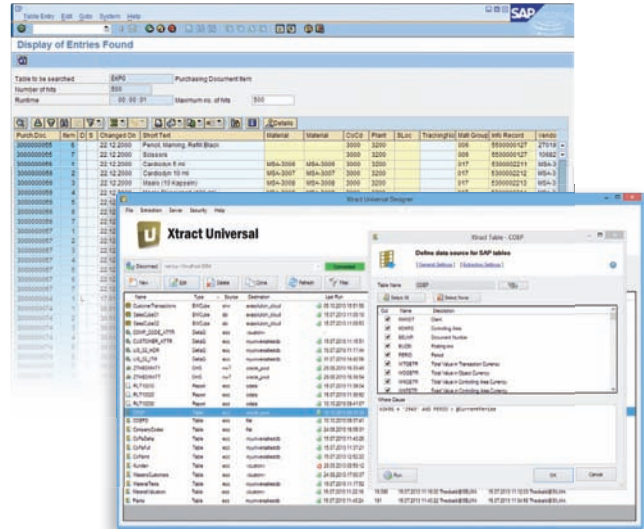

Data integration options

Data flows between SAP and Tableau can be enabled in different ways depending on the desired architecture and how it fits into an existing customer landscape.

- » Create and update an arbitrary data warehouse (e.g. Oracle, SQL Server, Teradata, etc.), combine SAP data with data from other systems and use Tableau on top of it.
- » Directly stream data between SAP and Tableau which does not require any intermediate storage. The data is transported through the standard OData protocol.
- » Create so-called TDE data files, a format developed by Tableau that contains highly compressed data which can be directly consumed by the Tableau engine.

- » Based on SAP certified technology
- » Quick installation and configuration
- » Simple and user-friendly; no programming or complex syntax required
- » Minimal to zero intrusion in your SAP system
- » Works with SAP BW as well as your SAP business suite (ERP, CRM, etc.)
- » Extract SAP data from a broad range of objects, including existing cubes and BEx queries
- » Central monitoring and process monitoring for complete control of SAP access

Enterprise scale and security

Xtract Universal can meet your IT and advanced user requirements:

- » Secure access to your SAP data, with single sign-on option
- » Performant and reliable data extraction
- » Central monitoring of all extraction activities and detailed logging
- » Wide variety of extraction types that can be used to extract data from all SAP business modules as well as SAP BW
- » Integrated data type safety and traceability, from source through destination

Integration of SAP ERP and BW

The Xtract Universal Component Suite offers nine components to provide all kinds of SAP interface technologies, such as Tables, Queries, BAPIs, ABAP Reports or Hierarchies. Besides that a Delta-Mechanism is also available and forms the top class of the BI components for SAP-Tableau-Integration.

Xtract Universal for Tableau

License and costs
