Xtract BCM

No SAP know-how available? No problem, we'll do it for you!

With our Business Content Manager you have the possibility to use pre-defined views, without having to know exactly where the data is stored in your SAP system. Simply decide what you want to see and where, and we'll take care of the rest.

- » All common SAP tables are supported (> 300).
- » Incremental data load via delta extractions.
- » The entire process from data acquisition to your preferred BI or analytics tool.
- » Use of aliases in the target environment to make technical names understandable.
- » From the data source directly into your destination within a few minutes.

- » Create a finished DWH at the click of a button.
- » Predefined views that represent real use cases.
- » Integrated wizard for ease-of-use is provided.

12 SAP modules are supported:

Materials Management (MM)	Sales & Distribution (SD)	Financial Accounting (FI)
Controlling (CO)	Basic Components (BC)	CRM (CRM)
Variant Configuration (LOVC)	Personal Management (HR)	ABAP
Production Planning (PP)	User Administration (UA)	Customer Tables (CS1)
